**Valcourt, Quebec, October 1, 2020** – BRP (TSX:DOO; NASDAQ:DOOO) and its Can-Am On-Road brand are accomplishing something traditional motorcycle manufacturers have been attempting to do for years: attracting new, younger, and more diverse riders into the industry. The success has made Can-Am the #1 brand in the three-wheel market. And with an updated vehicle lineup for 2021 that remains incredibly fun and easy to ride, Can-Am will continue its charge to democratize the open road.

“We believe that the open road should be open to all,” said Josée Perreault, SVP of Can-Am On-Road at BRP. “Those aren’t just words. It doesn’t matter if you’re an experienced rider or a rookie, what your ethnic background is, or if you’re a man or a woman. Everyone should be able to experience the incredible fun and freedom of riding. Our vehicles and our approach are centered in that, which is why we continue to outpace other well-known, iconic brands.”

#### Demonstrating Success (example of North-America)

- ~32% of Can-Am On-Road vehicle owners are female, compared to less than 20% of current riders in the motorcycle industry as of 2020;
- Close to 50% of Can-Am Ryker vehicle owners come from diverse communities

The Can-Am On-Road approach is focused on building innovative vehicles that cater to different types of riders and lifestyles.

## **Vehicle Lineup**

The Can-Am On-Road vehicle lineup includes two core models – the Ryker and the Spyder. The Can-Am Ryker is built for personalization and accessibility, both in terms of cost and ease of use. It is for adventure-loving people looking for shorter, more urban rides. The Can-Am Spyder, on the other hand, is for people looking for longer adventures, often riding thousands of miles/km per year.

The Can-Am Spyder RT is the pinnacle of comfort for long-distance rides. And new for 2021 is an exclusive Sea-to-Sky version, which gives a nod to the iconic Sea-to-Sky highway in British Columbia. It brings enhanced luxury, comfort, and convenience in the form of new wheels, trims, and badging for a unique premium look, as well as adaptive foam seats that reduce pressure points during longer rides.

The Can-Am Ryker lineup has also been refined for 2021, with a focus on accessories and personalization. Since its launch in 2018, the Can-Am Ryker has been a key catalyst for industry growth, helping to unlock the full potential of the three-wheel vehicle industry.

### Can-Am Ryker Customer Quick Hits (figures for North-America)

- 54% are new to the sport
- 36% are female
- 72% are under the age of 55
- 48% come from diverse communities
